Sulzer Further Strengthens its Position in the Nuclear Business

With the acquisition of the French company MATIS INTERVENTIONS SARL, the Pumps Equipment division strengthens its presence in the French power market, especially in the nuclear business. The acquisition will enhance Sulzer's service offering and increase the value Sulzer delivers to its customers in the French market.

MATIS INTERVENTIONS is a well-established specialist in the maintenance of rotating machines in the French power market. The privately owned company was founded in 2003 and is located in Locqueltas near Vannes, France. The current owner will remain within the business, and the facility in Vannes, with its current setup and employees, will be maintained and further developed.

Sulzer, headquartered in Winterthur, Switzerland, since 1834, is specialized in pumping solutions, rotating equipment maintenance and services as well as separation, reaction, and mixing technology. Sulzer designs, develops and supplies pumping solutions and related equipment worldwide. Intensive research and development in fluid dynamics, process-oriented products, and special materials as well as reliable service solutions help the company maintain its leading position in its focus market segments. The company is a leading provider in its key markets: oil and gas, power, and water. Sulzer serves clients worldwide through a network of over 150 production and service sites and has a strong footprint in emerging markets. In 2014, the company achieved sales of over CHF 3.2 billion with around 15,000 employees. www.sulzer.com
